DETAILED ACTION

1. The preliminary amendment filed on November 16, 2001 was entered as Paper No. 5 on November 23, 2001.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 12, 14, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Balback (US 5,327,652).

Balback discloses all the recited elements of the invention including:

- a) a first member (19) including a die receiving surface (24), a die retaining element (30) associated with the die receiving surface, and a substantially planar die (26);
- b) a second member (18) including a substantially planar die sheet supporting surface (22);
- c) handles (12, 13).

Regarding claim 14, element 30 mechanically secures element 26 to element 24.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3724

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Balback (US 5,327,652) in view of Benson et al. (US 5,660,105).

Balback discloses the invention substantially as claimed except for the die retaining element being magnetic. Benson teaches a magnetic die retaining element (44). It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ a magnetic die retaining element as taught by Benson on the device of Balback in order to facilitate attaching and disconnecting of the die.

6. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Balback (US 5,327,652) in view of Sabin (US 5,172,622).

Balback discloses the invention substantially as claimed except for a cushioning member. Sabin discloses a cushioning member (22). It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ a cushioning member as taught by Sabin on the device of Balback in order to minimize wear on a cutting edge of the die.

Response to Arguments

7. Applicant's arguments with respect to claims 12-16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Choi whose telephone number is 703-306-4523. The examiner can normally be reached on Monday thru Friday between 9am and 5pm. If
